

2027-2028 Palomar UC San Diego Health PGY-2 INFECTIOUS DISEASES RESIDENCY

Building a Stronger Future of Healthcare in Our Region

Train at a \$956 million state-of-the-art facility in Escondido, California. Palomar UC San Diego Health Escondido opened in August 2012 and serves as a symbol of the hospital's commitment to becoming the healthcare system of the future.

As North County's most comprehensive healthcare delivery system, Palomar UC San Diego Health is recognized for clinical excellence in cardiac care, women's services, orthopedics, trauma, rehabilitation and behavioral health services. Facilities include Palomar UC San Diego Health Escondido, Palomar UC San Diego Health Poway, Ambulatory Oncology Infusion Center, The Villas at Poway Skilled Nursing Facility and the Rehabilitation Institute. Additionally, Palomar UC San Diego Health has expanded its NICU to 12 beds and is recognized as a Stroke Center of Excellence.

Palomar UC San Diego Health's vision is to be the health system of choice for patients, physicians and employees, recognized nationally for the highest quality of clinical care and access to comprehensive services.

"The mission of Palomar UC San Diego Health is to heal, comfort and promote health in the communities we serve."

PHARMACY SERVICES

Vision Statement:

To improve patient outcomes by providing compassionate care through medication management, education and collaboration with our patients and professional colleagues.

Our Purpose:

The foundations of services provided by Palomar UC San Diego Health Department of Pharmacy Services are:

- > Contribute to optimal therapeutic outcomes.
- > Provide information for appropriate application of pharmacotherapeutics.
- > Maintain an efficient and fail-safe drug distribution system.
- > Support healthcare providers in the delivery of distinguished patient care.
- > Attract, develop and retain highly qualified pharmacists and technicians.

Pharmacy Services:

The Pharmacy Department provides comprehensive services on both campuses, at Escondido and Poway.

The facilities have implemented an automated distribution model, consisting of inventory management and automated dispensing cabinets. Clinical services include pharmacokinetics, anti-coagulation management, total parenteral nutrition, renal dosing, antibiotic utilization evaluation and multidisciplinary rounds in our ICU, Trauma areas and Code team participation.

Palomar UC San Diego Health Escondido also has an outpatient oncology infusion center and outpatient pharmacy that provides specialty drugs. Palomar UC San Diego Health Escondido is a teaching site for UCSD & UCI Schools of Pharmacy, and primary site for the PGY1 pharmacy residency program and PGY2 program in Infectious Diseases.

OVERVIEW OF PROGRAM:

The PGY2 Infectious Diseases residency program will be designed to develop the resident's skill as a clinical specialist in infectious diseases. The goal will be to provide the candidate with the skill and experience required to lead an antibiotic stewardship program at a community hospital in concordance with the CDC core elements. In addition to daily patient care skills, the resident will develop skills in maintaining the required antimicrobial usage measurements to comply with the CDC core elements and those required by the National Health and Safety Network. The resident will act as a co-chair for the anti-microbial subcommittee; attend medical staff department meetings, infection control meetings and related subcommittees. The resident will work closely with the Infectious Diseases physician, and other disciplines including the microbiology laboratory, infections control practitioners, nursing, information technology and other departments consistent with infectious diseases.
